The first time you turn on the handheld, press and hold the Power key then select the language used by the Windows Mobile operating system.

**CAUTION** – You can only select the language once. To change the language used on the handheld, you must return the device to your Trimble service provider.

To select the language used on the handheld:
1. Press the Up or Down Navigation key to select the language you want to use and then press the Enter key.
2. In the confirmation screen that appears:
   - To select a different language, press the Enter key to return to the previous screen.
   - To use the selected language on the handheld:
     a. Use the Up Navigation key and the Enter key to check the box and confirm your selection.
     b. Use the Down and Right Navigation keys to select the Next button.
     c. Press the Enter key to install the selected language.

Once the selected language is installed, the handheld restarts. Follow the on-screen instructions to align the touch screen, using the stylus to tap on the screen.

Select the time zones and set the correct date and time on the handheld.

You can protect your data by setting a password on the handheld. When set, this password is required every time the unit is turned on.

Follow the on-screen instructions to set your password, or select Next to skip this step.

**TIPS** –
- To enter special characters, tap Tab to display keypads containing numbers and symbols. To switch back to the main keyboard, tap Tab again.
- To make the keys larger, tap the Input Selector arrow and then tap Options. In the Input method list, select Keyboard and then select Large Keys.
Connecting to a computer
To transfer files to the handheld, or to install software onto the handheld, you must connect the handheld to a computer. If the computer is running the:
- Windows Vista® or Windows 7 operating system, use the Windows Mobile Device Center (WMDC) to manage the connection.
- Windows® XP or 2000 operating system, use Microsoft® ActiveSync® technology to manage the connection

**Note** – You must install the Windows Mobile Device Center or ActiveSync technology onto the computer before you connect the handheld.

To download the Windows Mobile Device Center or ActiveSync technology from the Microsoft website, go to www.microsoft.com/windowsmobile.

### Set the date and time zone
In the Today screen, tap the clock icon. The Clock Settings screen appears. Tap the Time tab, select the Time zone setting, and then select the correct time zone for your location.

### Troubleshooting
If the screen on the handheld is blank, do one of the following:
- Tap the screen with the stylus or press one of the Navigation keys to turn on the backlight.
- Press the Power button to turn on the handheld.

If the handheld stops responding to the stylus, or if it does not respond when you press any keypad button, you may need to reset it. First, try a soft reset. If the handheld does not respond, perform a hard reset.

#### Performing a soft reset
Hold down the Power key for about 3 seconds to display a countdown. Continuing to press the Power key will cause a reset when the countdown reaches zero.

#### Performing a hard reset
Note – Any unsaved data may be lost and ScanAgent, SatViewer and CellStart (found on the documentation CD) and any other applications installed will need to be reinstalled using ActiveSync after a hard reset. Perform a hard reset only if performing a soft reset does not resolve the issue.

To perform a hard reset, Hold down the Power key and press the right soft key to display a countdown. Continue to hold both keys until it counts down to zero, followed by a brief appearance of the boot screen. Continue to hold both keys down until a screen appears warning that if you continue, this operation will clear the persistent store. Follow the instructions on the screen ONLY if you want to completely clear your unit.

### Connecting to GPS
To collect GPS data, install GPS field software onto the handheld and, if required, configure the software to connect to the integrated GPS receiver.

The Wi-Fi and Bluetooth icons in the Today screen show the status of each radio. Tap the icon to access the Wireless Manager and turn on or turn off the radio.

### Fitting the handstrap
1. Attach one end of the hand strap to the hook near the bottom of the back of the Nomad.

2. Stretch the hand strap toward the top end of the unit and attach it to the hook near the top.

### Applying the screen protector
Install the screen protector. Peel the backing Smooth with the enclosed installation card if needed to remove air bubbles.
